

Same Emergency. Same Advanced Treatment.

RMC Links with MUSC Health to Enhance Stroke Patient Care

Through the South Carolina Telehealth Alliance, there is a new collaboration between the Regional Medical Center and physicians at MUSC Health. This relationship ensures access to advanced stroke care every minute of every day through telehealth. That means more saved lives and less permanent disabilities for survivors. The Primary Stroke Center at RMC is just another way patients can get the best care, at the right time, right here in our community.
