Your doctor has prescribed a Consistent Carbohydrate (CHO) and Renal diet for you during your stay. This consistent carb diet is used to control diabetes. Carbohydrates are the foods that raise your blood sugar. Examples are milk, fruit, and starches (rice, pasta, bread, corn, potatoes, beans). Sugar substitutes can be requested as sweetener. This diet allows you to eat the foods you want, if you stay within your CHO levels for each meal. The number of CHO grams is listed next to the food items below to assist you when ordering. The renal diet is necessary in the treatment of many kidney diseases and disorders. It limits sodium and potassium (800mg each per meal) which can build up in the blood and become harmful.

Your doctor will prescribe one of the CHO levels listed below that best meets your needs:

- **Level 1**: Breakfast = 45 g CHO / Lunch = 45 g CHO / Dinner = 45 g CHO (1 snack = 15-20 g CHO, optional)
- **Level 2**: Breakfast = 60 g CHO / Lunch = 60 g CHO / Dinner = 60 g CHO (1-2 snacks = 15-20 g CHO, optional)
- **Level 3**: Breakfast = 75 g CHO / Lunch = 75 g CHO / Dinner = 75 g CHO (1-2 snacks = 15-20 g CHO, optional)

### Entrees
- Egg (Scrambled, Low Cholesterol)
- Scrambled Tofu (5)
